The expedition set sail from Norway in June 1893, and for three years, the Fram drifted with the ice pack. During that time, Nansen and his crew made numerous scientific observations and collected valuable data about the Arctic environment.

In 1896, the Fram finally reached the open water of the North Atlantic Ocean. Nansen and his crew had crossed the Arctic Ocean, becoming the first people to ever do so. Their expedition was a major triumph for polar

exploration, and it helped to pave the way for future expeditions to the Arctic.

They also studied the wildlife of the Arctic, and they made important discoveries about the behavior of polar bears and other Arctic animals.

In 1896, the Fram finally reached the open water of the North Atlantic Ocean. Nansen and his crew had crossed the Arctic Ocean, becoming the first people to ever do so. Their expedition was a major triumph for polar exploration, and it helped to pave the way for future expeditions to the Arctic.
